NOW AVAILABLE!

Upgrade, makeover or retrofit existing lighting with ease, using our range of VIBE coverplates. Designed to facilitate quick and easy lighting upgrades to enhance energy efficiency and overall lighting performance, these plates are the perfect solution for almost any setting.

Say goodbye to costly plasterwork and repairs when replacing larger, outdated fittings. With our VIBE coverplates, you can quickly cover existing cutouts from older fittings and install new trimmer downlights with minimal hassle. Simply choose from our selection of coverplates that best suit your needs and clip in your new fixtures. Recessed downlighting made easy.

Our conversion plates come in a variety of sizes, offering both inner and outer diameters to fit a range of standard cutouts.

Available in a standard white trim, these plates can also be custom powder-coated to complement your interior or exterior design. Contact us today for a tailored quote specific to your project requirements.

Features:

- Standard white trim*
- Various cut hole sizes can be covered ranging from 75mm to 264mm

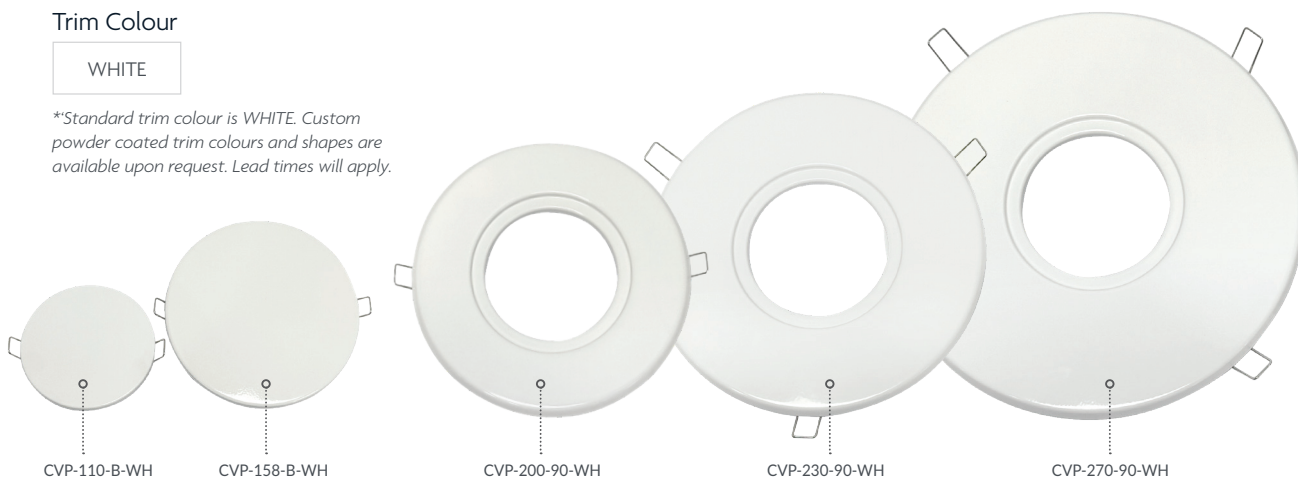

Lighting use:

- Residential - kitchen, living, dining areas
- Retail - shopping centres, cafes, medical, reception areas
