

Suspended Aluminium Profiles

VB-SALP-SERIES

LET'S BRING YOUR CREATIVE VISION TO LIFE

Designed for modern architectural lighting, suspended aluminium profiles are ideal for applications where both functional and decorative lighting is needed. These profiles are suspended from ceilings to create striking linear light features that offer even, glare-free distribution.

Ideal for seamless, continuous linear lighting, each profile comes with a high-quality PC or PMMA opal diffuser that provides soft, uniform illumination. Most profiles are available in standard lengths of 1M, 2M, 2.5M, and 3M, with custom sizes and colours available upon request. Choose from a variety of styles, including standard rectangular and round profiles, to suit different design needs. Made from durable, high-grade aluminium, these profiles not only enhance the look of your installation but also provide efficient heat dissipation—helping to maximise the performance and lifespan of your LED strip lights.

Key Features

- **Versatile Installation:** Suitable for a wide range of applications including kitchen benches and islands, reception desks, bar tops, cafés, retail displays, shopfronts, office workstations, boardrooms, and architectural lighting installations.
- **Seamless Linear Lighting:** Designed for smooth, continuous light output with a clean, modern finish.
- **Enhanced LED Performance:** Effectively dissipates heat, helping to extend the lifespan and performance of your LED strip lights.
- **Flexible Length Options:** Most profiles are available in standard 1M, 2M, 2.5M and 3M lengths, with custom sizes available upon request.
- **High-Quality Diffuser:** Features a durable PC/PMMA opal diffuser for soft and even light distribution.
- **Stylish Finish Options:** Supplied in anodised aluminium as standard. Select models available in black and white, with custom colours available on request.

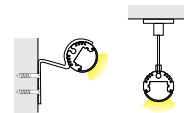

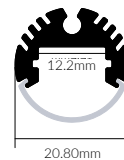

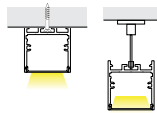

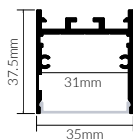

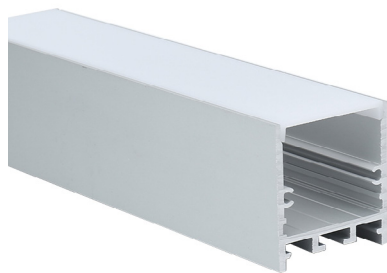

**Please note: Accessories are sold separately.*

Suspended Aluminium Profiles

VB-SALP-SERIES

VB-ALP018

Applicable max power: <25W/M

Length: 1M/2M/2.5M/3M

Standard Finish*:  Anodised

Accessories - Ceiling Roses & Clear Cables

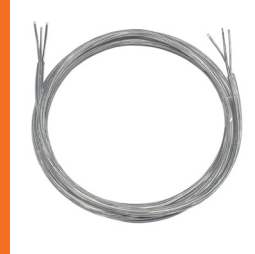

VB-ALP-CR-WH

VB-ALP-CR-BLK

VB-FLEX-2CORE-CL

VB-FLEX-3CORE-CL

CEILING ROSES

Ceiling Roses can be ordered separately (as required) when suspending any of Vibes aluminium extrusions. Available in BLACK or WHITE.

CLEAR CABLES

Vibes Clear Cables are available for purchase by the meter, offering options in both 2 Core and 3 Core.

2 CORE CABLE: is mainly used when LED Strip is installed into an aluminium extrusion and then powered with either a 12V or 24V remote constant voltage driver.

3 CORE CABLE: is mainly used when LED Boards are installed into an aluminium extrusion and powered with an internal constant current driver.

Suspended aluminium profiles offer a versatile and stylish solution for showcasing LED strip lighting. With flexible sizing options and sleek finishes, they enhance both function and aesthetics—making them ideal for modern commercial, residential and architectural applications.

Easily paired with VIBE's extensive range of 24V LED Strip Lights, these profiles offer a seamless solution for professional, custom lighting installations.
