

Surface Mounted Aluminium Profiles

VB-SMALP-SERIES

LET'S BRING YOUR CREATIVE VISION TO LIFE

Surface mounted profiles are purpose-designed housings for LED strip lights. These aluminium profiles offer a professional and practical way to install LED strips on visible surfaces without recessing into walls, ceilings, or cabinetry.

VIBE offers various configurations—including standard, corner, and wardrobe profiles—these profiles cater to different installation angles and design requirements. Standard profiles are ideal for general-purpose applications on flat surfaces, corner profiles are designed to project light at 45° angles (perfect for under shelves or in wall junctions), while wardrobe profiles are tailored for use inside cabinetry, wardrobes, and display units where discreet, functional lighting is needed.

Key Features

- **Versatile Installation:** Suitable for a wide range of applications including under cabinetry, ceilings and walls—ideal for achieving a refined architectural look.
- **Seamless Linear Lighting:** Designed for smooth, continuous light output with a clean, modern finish.
- **Enhanced LED Performance:** Effectively dissipates heat, helping to extend the lifespan and performance of your LED strip lights.
- **Flexible Length Options:** Most profiles are available in standard 1M, 2M, 2.5M and 3M lengths, with custom sizes available upon request.
- **High-Quality Diffuser:** Features a durable PC/PMMA opal diffuser for soft and even light distribution.
- **Stylish Finish Options:** Supplied in anodised aluminium as standard. Select models available in black and white, with custom colours available on request.

**Please note: Accessories are sold separately.*
