

ALUMINUM CORNER PROFILE 2.5M

VB-ALP6969-2.5M

Our corner surface-mounted aluminum profile is a specialized channel designed to install LED strip lights at the junction of two surfaces, such as where walls meet or between a wall and ceiling. This profile is mounted directly onto the surface, providing a clean and modern look while efficiently dissipating heat to enhance the longevity of the LED strips. Equipped with a diffusing cover, it ensures smooth and uniform light distribution, reducing glare. Ideal for creating accent lighting and illuminating corners, it is perfect for both residential and commercial applications. Vibe's Series of Aluminium Profiles use high quality 6063-T5 aircraft Aluminium and environmentally friendly PMMA (polymethyl methacrylate) or PC (polycarbonate) covers, producing an elegant appearance with excellent heat dissipation. Please note: Required end caps, mounting clips and LED Strip Lighting sold separately under code VB-ALP-ACC & VBLST.

Features & Benefits

- Applicable Max Power: <00W P/M.
- Surface mounted extrusions are the perfect answer when the design doesn't allow or doesn't warrant a recessed profile & in many cases you will find a recessed profile has a surface mount "twin brother" in both size & shape.
- Suspended Extrusions look great over any kitchen bench, reception desk or bar top etc and make any retail shop display look stylish and modern.
- Prolong the life of your LED strip lights by dissipating the heat generated during operation
- Perfect for seamless continuous linear lighting

- Most (not all) are supplied in 1m, 2m & 3m lengths & can also be customised upon request.
- PC/PMMA Opal Diffuser • All available as standard Anodised Aluminium colour
- * Some models/sizes available in Black & White
- ** Custom colour also available on request
