

VB-DT-150R-PB

PUSH BUTTON DIMMER SWITCH 150W MAX FOR LED FITTINGS

Experience smooth, precise light control with our Trailing Edge Push Button Dimmer, engineered for modern dimmable LED lighting. Advanced trailing-edge technology delivers silent, flicker-free performance while protecting fittings from overload and premature wear.

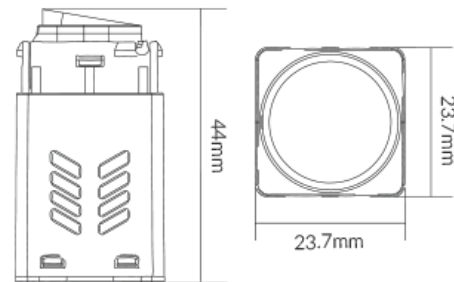

Ideal for hallways and staircases. Designed for compatible LED, incandescent and halogen loads, it features adjustable minimum brightness for optimal stability. The mechanism is non-polarity sensitive, fits standard Australian wall plates, and complies with AS/NZS and international EMC standards.

KEY FEATURES

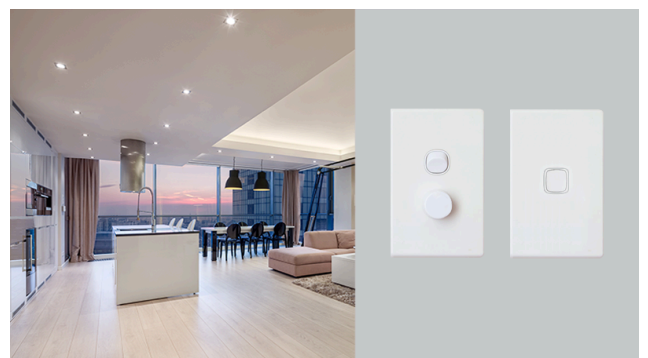

- Two-wire phase control wall plate dimmer
- Soft-start function to extend lamp and driver life
- Optimised dimming performance for LED lamps & drivers
- Compatible with incandescent, 240V halogen & low-voltage halogen lamps with dimmable electronic transformers
- Full short-circuit protection
- Resistant to high-frequency (ripple) signal interference on mains supply
- Complies with Australian and international EMC standards

SPECIFICATIONS

SKU	VB-DT-150R-PB
Power (W)	150W (LED)
Dimmable	Triac Dimmable
IP Rating	20
Trim Colour	Blue
Weatherproof	Indoor Use Only
Height (MM)	44
Length (MM)	23.7
Width (MM)	23.7
Working Temp	-20°C ~ 45°C
Warranty (YRS)	3

APPLICATION

ADDITIONAL INFORMATION

- Designed to dim down to zero without switching off.
- Must not be connected in series or parallel with another dimmer.
- Minimum load: 5 VA (LED), 10 VA (Incandescent).
