

20W LED SOLAR LIGHT

VB-NM-20W-4-5K

Yes, streetlights are available in Solar! Our incredibly popular NEW Moon Streetlights with PIR Sensor and use highly efficient solar components, are equipped with a quality LifePo4 lithium batteries, intelligent solar controller and a Panasonic infrared induction sensor. The compact New Moon solar light is easy to adapt to a range of applications. With a host of standout features including bird spikes to prevent landing and nesting, rotatable LED modules to angle the light exactly where you need it and dual sided Solar Panel allows charging from both sides - these are the ultimate street and area lighting solution. Perfect for Caravan Parks, Local Parks & Gardens and anywhere where 240V power is unavailable OR energy saving and sustainability is a high priority. This model is 20W.

Features & Benefits

- Compact & modern design
- Utilises human body infrared induction control technology - when no infrared motion is detected, light dims down to 30%
- Comes standard with Anti Bird Spikes
- Very high light output - over 200 LM/W
- Operating Time: 10 hours (full power) - 30 hours (power saving)
- Charging Time: 6-7 hours (under direct sunlight)
- Capable of performing even after several overcast days
- Suitable for Pole Mounting (60 - 90mm diameter)
- Easy battery replacement
