

VIBE SOLAR BOLLARD

VBLBOS-001-4-5K

This Vandal Resistant Solar Bollard offers exceptional dusk til dawn lighting for commercial locations or anywhere vandalism may be a concern. With a lamp housing that is manufactured from UV Stabilised High Impact Polycarbonate, this premium product uses security fixings and features a stem of powder-coated aluminium. (316-grade Stainless Steel is available upon request). Providing a high resistance to heavy impact & also water ingress & with long-life LiFeP04 batteries, this fitting is perfectly suited for public spaces as both security and safety lighting. The invisible 360° radar sensor detects movement, increasing the lamps output as you approach and dimming as you pass, ensuring maximum output is available when required while still providing ambient light and retaining battery charge when full output is not necessary. Made in China.

Features & Benefits

- UV Stabilised High Impact Polycarbonate, and a stem of powder coated aluminium (316 grade stainless steel is available upon request)
- Motion Sensor
