

LED SOLAR BOLLARD BLACK 950MM WILDLIFE FRIENDLY VANDAL RESISTANT

VBLBOS-001-4-WF

The LED Chips inside our “Wildlife Friendly” Solar Bollard are specifically designed to minimise the ecological impact that traditional lighting has on sea turtles, bats, frogs, and many insects...especially near the ocean. Nesting turtles navigate by moonlight reflecting off the ocean. Artificial light from development near turtle habitats is often mistaken for moonlight, disorientating nesting turtles. Effective wildlife friendly lighting must be shielded, kept low to the ground, be low-wattage and emit a light wavelength of 560 nanometres or higher which to the human eye appears amber and is invisible to most wildlife. The Wildlife Friendly Vandal Resistant solar bollard protects the environment and provides a sustainable and energy-saving lighting solution.

Features & Benefits

- Wildlife friendly - 560 NM (Nanometer)
- Superior vandal resistant design features
- Dusk until dawn lighting
- Premium LiFeP04 battery
- Microwave motion sensor
- Unaffected by mains power outages
- Stainless steel tamper proof security fixings*
- Bolt down or inground stems

LED SOLAR BOLLARD BLACK 950MM WILDLIFE FRIENDLY VANDAL RESISTANT

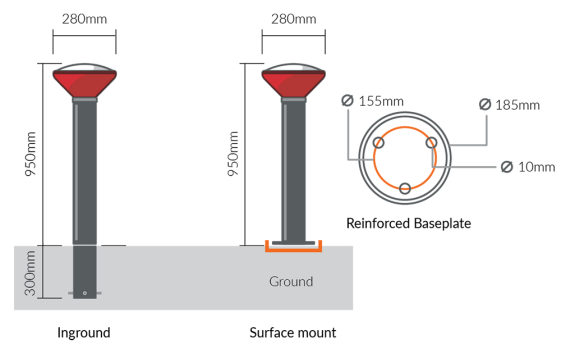

VBLBOS-001-4-WF

Specifications

SKU	VBLBOS-001-4-WF
EAN	9340994031392
Light Colour	Red
IP rating	66
IK Rating	10
Trim colour	Black
Width	280 mm
Height	950 mm
Lifespan	50000 Hours
Warranty	5 Years
Mounting type	Surface
Material	Anodised marine grade aluminium, S/S, PC
Lamp Type	LED / Solar
