

3X5-F-G Series

VBLFT-325-F-G

Featuring a high quality aluminium body, and an energy saving of up to 60% - the LED Green Tube Lamps make great direct replacements for T8 fluorescent lamps. Suitable for Emergency & Eye wash stations.

Features & Benefits

- Green LED tubes are mainly used in chemical “Eye Wash Stations”. This is more based around risk assessment as the colour green is associated with a medical facility. The green light readily identifies where the Eye Wash Stations are located for ease of finding in an emergency.
